I don't have audio

12:19:24 From Gabriel Curell to Everyone:

12:19:24 From Anishia Coleman to Everyone:  
I don't have audio either 🗣️  
12:19:32 From Mari Spinelli-Albuquerque NM to Everyone:

12:19:58 From Mike to Everyone:  
use a call-in number from the Phone menu. it gives you the meeting ID and your ID also  
12:19:59 From Kim to Everyone:  
Reasoning for stopping rain catch is reservoirs/municipal water sources would begin to go down as the practice increased... you'd have water, city might be struggling... I went through this in NC a few years back  
12:20:07 From Mike to Everyone:  
you have to key the numbers in quickly  
12:20:21 From Joel B. Peterson to Everyone:  
@MS They say their reasoning is it lowers the reservoir collection! one of the many reasons why I want to leave NV  
12:20:27 From Mari Spinelli-Albuquerque NM to Everyone:  
I think we all need to drill Primary Water wells. This fight about water, according to the Primary Water Institute is not necessary. Plenty of Water

12:25:56 From Micah L. to Everyone:  
I suspect when the dollar officially collapses, food is scarce, and ppl start frantically scrambling about technical "land rights" will be thrown out the window. It would be the least of concerns for government enforcing that stuff.

12:34:11 From Mike in NC! to Everyone:

Exactly @Rebecca! We used to have LLCs and it was a pain to keep updated on the ever changing taxes, etc. Expensive also. It was easier in AZ, but then moving to NC, all the rules/fees changed. So we dropped them.

12:34:30 From Lynn Avery to Everyone:

You CAN collect rainwater in Colorado now, as of 2016. They 'allow' 110 gallons per household.

I think most of us have had Covid now so I think shedding is less of a concern. I'm assuming its spike protein that is being shed tho.

12:54:14 From Susan to Everyone:

i heard it's better to be unincorporated

12:54:19 From Barbara Hill to Everyone:

I spent a year trying to get over the sickness I got from my vaccinated roommate so I feel a little burnt right now.

12:54:33 From Julie + kiddo, Québec. to Everyone:

I was in a community in which a few members found backdoor ways to force vaccine-free people out. We'd just bought 700 acres together. I feel betrayed. Definitely better to just be clear from the outset if the community will or will not follow the mainstream narrative.

12:54:39 From Sadaya Jaret to Everyone:

there is also a PMA or PME and a 508 which does NOT attach one to the govt corporate engine. This attachment is what happened to the churches and non profits who were controlled during the last 2 years

12:54:44 From Brett Spradlin to Everyone:

It's not the vax that makes one toxic. It's the mindset of dependence upon government and pharma that makes them toxic.

12:54:48 From Alex K from central Ontario Canada to Everyone:

@Barbara, hopefully that means you're now immune to it though 😊

12:55:46 From Mari Spinelli-Albuquerque NM to Everyone:

@Barbara, I had it really severely this past December. Still recovering on some ways. Supplements have helped a lot and of course time. Hang in there.

12:56:19 From Julie + kiddo, Québec. to Everyone:

I agree, @Brett!

12:56:30 From Damon Clark to Everyone:

@Brett Spradlin, YES EXACTLY! And the fact that because they got the vax, they died on the cross for man's sins. It's irksome.

12:56:49 From Edward to Everyone:

I agree Brett 😊

12:57:01 From GregB to Everyone:

The legal term for a PMA is a "unincorporated association" - researching that term yields a lot more information than researching PMAs.

12:57:04 From ddesisto to Everyone:

Doing a great job explaining it, John.

12:57:09 From Barbara Hill to Everyone:

@MARI Thanks, Mari. It's the lung congestion that won't go away. I was told by a naturopath that being around my "shedding" roommate wasn't helping my recovery. But I got a NASA-design "bracelet" that is supposed to help with that. Thanks, Mar.

12:57:11 From Joel B. Peterson to Everyone:

Shedding is not new, thats why they say to stay away from pregnant women,

and sick people, usually for 2 to 4 weeks, I believe! Its written on the pamphlets in the Vaccines!

12:57:15 From Damon Clark to Everyone:

I meant to say they ACT LIKE the died for man's sins...

12:57:16 From ddesisto to Everyone:

Super important stuff

12:57:58 From Nathaniel Doromal to Everyone:

@Barbara You might be helped by doing a 5-day ivermectin course as recommended by FLCCC.

12:59:03 From Christine to Everyone:

what happens if the grid goes down and com

12:59:44 From Gabriel Curell to Everyone:

ivermectin really works although was hard to get maybe easier now

13:00:02 From Alex K from central Ontario Canada to Everyone:

@Christine I think it is rather unlikely for the comm to go down, since that's the most prevalent source for the spells being put out ☺

13:00:04 From ddesisto to Everyone:

There will be many more problems to deal with if the grid goes down, I think, Christine. Many other things will be more important.

13:00:23 From Christine to Everyone:

for sure

13:00:25 From Rich to Everyone:

Not sure about whether it would help with covid/vax complications, butOne of the most powerful immune modulating/resetting practices is fasting, I just completed a 5 day water fast and it really helped a lot of symptoms of my complex chronic illness.

13:00:32 From Damon Clark to Everyone:

13:00:41 From Micah L. to Everyone:

13:00:52 From Rebecca Cunningham to Everyone:

Barbara, IVM does help alot - Nathaniel was spot on - look up the FLCCC protocol for post covid/post vax

13:00:57 From Mari Spinelli-Albuquerque NM to Everyone:

@barbara talk to your naturpath about specific lung interventions. Depending on what was most targeted by your course of covid, it can take quite a while to recover and it may not get back to 100% of where you were. For me, I'm asthmatic and it takes quite a while to get over respiratory infections and hence why I work hard to prevent, prevent, prevent.

For example, many power types have to keep making energy available as if it was being used at peak times, but that power doesn't get used in off peak times. So the environmental impact is happening either way. Crypto uses that unusable energy.

13:33:33 From ddesisto to Everyone:

Will you have a group connection site? I mean is there a way for those of us in your circle to stay connected?

13:33:51 From DannyLilly to Everyone:

Hopefully, my project at Tombstone could be part of this network being proposed

13:33:53 From Azlan White to Everyone:

there is also some wisdom in having an LLC that owns the property, then another LLC that does all operations.

13:34:00 From Azlan White to Everyone:

Its good to have multiple LLC's

13:34:02 From GregB to Everyone:

In Texas you can use a series LLC - much easier and lower cost

13:34:33 From Josh F to Everyone:

One that owns the company, one that handles the payments and rents?

13:34:45 From tamaraosborn to Everyone:

Danny I am in northern Az would love to chat with you

13:35:19 From Azlan White to Everyone:

@Josh, yes separating operations protects the other LLC that owns the land from any law suits.

13:35:28 From Sherryl to Everyone:

Could you still be protected form liability by renting on your land, under a land trust instead of LLC?

13:35:30 From Joel B. Peterson to Everyone:

Most counties, cities, have a SCORE, SBDC, SBA, and will help with all the above!

13:36:05 From Josh F to Everyone:

Ok thanks @Azlan, does the operations LLC own the real estate on top of the land? Or does it depend

13:36:16 From Azlan White to Everyone:

@Sherryl, I think the main thing is that the entity owning the land does nothing else

13:36:19 From Sannalee to Everyone:

Tamara - where in North AZ are you? We have spent quite a bit of time looking at a pecan farm property in camp verde. Unfortunately that has fallen thru but we are still curious about NAZ

13:36:39 From Azlan White to Everyone:

@Josh, no there is one LLC that only owns land.

13:36:39 From tamaraosborn to Everyone:

Danny im in Sedona

13:36:46 From Azlan White to Everyone:  
the other LLC does operations

13:37:23 From Josh F to Everyone:  
Ok, guess i was thinking of building structures and the ownership of the infrastructure

13:37:52 From Vicky jo Baker to Everyone:

13:41:07 From Azlan White to Everyone:

13:42:30 From Luthie to Everyone:

Wow thank you Julie + kiddo! Love CHD!

13:42:37 From Damon Clark to Everyone:

For me personally, it's not their vaccinated bodies that bother me, it's the mindset that most of them seem to possess. That can be a problem sometimes.

13:42:38 From Leslie to Everyone:

Awesome @Mike in NC! My last name is van Wichen.

13:42:46 From pianomusic to Everyone:

And also if someone decides to take a vaccination in the future, that will need to be covered, as well.

13:42:58 From Azlan White to Everyone:

@Julie I agree that was fascinating. @John I have been researching the spike protein myself and am curious about what your naturopath was sharing!!!

13:43:40 From Leslie to Everyone:

May I have your last name @Mike in NC?

13:43:59 From Damon Clark to Everyone:

Tiny Homes are COOL and AWESOME!!!

13:44:13 From pianomusic to Everyone:

13:46:14 From Damon Clark to Everyone:  
Yes, this true.

13:46:16 From John-Texas-Land Coops to Everyone:

13:47:29 From Joel B. Peterson to Everyone:  
Hello Julie + kiddo, am I correct to believe that the pamphlets in the vaccines actually say stay away from babies, pregnant women, and those that are sick, after being vexed! I think CHD, is one of the groups I learned this from!

13:47:38 From pianomusic to Everyone:  
Just doing it all virtually for now?

13:47:39 From Damon Clark to Everyone:  
It can be a sensitive and emotionally charged topic for sure.

Joel B Peterson: the pamphlets in the C vaxxes are BLANK.

13:48:31 From DaveS to Everyone:  
Yup was an anti war activist in Oakland CA for years, watched in horror as "progressives" suddenly became pro-censorship, pro-surveillance, anti-bodily-autonomy. Finally just Exited California, ready to start Building in TX/AZ

13:49:17 From Alex K from central Ontario Canada to Everyone:  
@Pianomusic, it looks like Mike who was sharing the invite, created the unofficial Telegram group for this event.

13:49:18 From ddesisto to Everyone:

13:49:51 From Joel B. Peterson to Everyone:  
@Lynn Avery—WOW, I never heard that! 🤔

13:49:52 From Deb Chandler to Everyone:  
What do folks know about realty trusts?

13:49:54 From Mike to Everyone:

@pianomusic "we" is about 30 of the people in this bootcamp. It's unofficial like I said, not hosted by John and Rebecca.

13:50:03 From Lynn Avery to Everyone:

Re: financing. A huge rabbit hole to go down is 1099A forms and accessing the credit in your cestui que trust. Christopher Hauser has a youtube channel devoted to it.

13:50:04 From jd to Everyone:

Linda & Kelly: are you aware of Pam Popper's weekly Zoom calls for healthcare professionals looking to transition out to parallel healthcare system? She is in Ohio, but I think her network is bigger than just that area.

13:50:10 From Frank Melli to Everyone:

Try to use a member owned community credit union over a bank for mortgages when possible... Often a good idea.

13:50:14 From pianomusic to Everyone:

@Mike: Thanks

13:50:42 From Mike to Everyone:

You're welcome

13:50:43 From Julie + kiddo, Québec. to Everyone:

13:52:26 From Azlan White to Everyone:

I have bad credit, really bad. i just cannot keep things payments on credit cards on time and feed so many animals that the animals have become the priority, not the banks . . . so i need alternatives

13:52:33 From Damon Clark to Everyone:

@John, do you mean to say that working with a bank is easier than owner financing?

13:52:44 From Linda DiVito to Everyone:

13:55:01 From Louise Dickson to Everyone:

@MB I have some suggestions for various online income streams (not MLM)

13:55:21 From Azlan White to Everyone:

The problem for me with vaxxed people (I would never discriminate) but my reproductive system needs a break! And my cardiovascular system. those systems are attacked by the spike proteins so in my home I don't want to be constantly attacked in my reproductive system etc.

13:55:25 From Megan to Everyone:

@DaveS - I so relate. I was a militant Radical Leftist for way too long. So glad I finally woke up but feel really behind and overwhelmed with where to even get started.

13:55:49 From DaveS to Everyone:

Does anyone know of Telegram group for Las Vegas/Nevada freedom cells? There are a few groups on the FC website but doesn't look like they're very active there. FC directory on TG doesn't show any channels for LV/NV

13:55:52 From Julie + kiddo, Québec. to Everyone:

Good point from the caller, the most important thing is for a community member to be conscious and aware of what is really going on. I know people who were coerced into getting vaxxed. I lost my job by not complyign with the Canadian Federal Govt. Mandate.

There are homeopathic remedies that are said to be effective against prions, sheddding, spike proteins. I encourage everyone to start learning about homeopathy. There are online classes, books, many websites. It's a huge subject, but if you start learning a little bit every day, p;retty soon you'll know a lot. Some excellent professionals are Lisa Samet in Montreal, Christina Villacorte in TX, Joette Calabrese in Florida, the Banerji MD/homeopaths in India (great grandfather, grandfather, father, son MDs and homeopaths), Dana Ullman in the SF Bay area, Tim Dooley in San Diego, MaryAspinwall in California, Many others. Dr. Sharma and his staff in India consult anyone anywhere online for very reasonable fee. He's a specialist in autism. His website has lots of information. Places to get homeopathy include homeopathyworks dot com, the Santa Monica Homeopathic Pharmacy, hahnemannlabs.com in San Rafael, CA, homeomart.com in India...

I got in... email went to junk folder again..

14:22:49 From Eva to Everyone:  
I see two official groups in Telegram - Live Free Community Group and Exit & Build Land Summit Community. Is there another TG group for this bootcamp?

14:23:04 From jd to Everyone:  
Someone asked about Pam Popper: She runs [www.makeamericansfreeagain.com](http://www.makeamericansfreeagain.com). She hosts weekly Zoom calls for people in healthcare looking to transition to parallel system. Lots of resources. Possibly also a resource for healthcare workers in Canada--the network is growing.

14:23:39 From jd to Everyone:  
Pam Popper also has videos on Rumble, etc.

14:24:01 From Alex K from central Ontario Canada to Everyone:  
@jd I've seen within some unrelated Telegram groups, that there is at least 1 organization that has set up a private health practice throughout Canada 😊

14:24:16 From Megan to Everyone:  
@Philip - yes! It's just that getting connected to the people who are right for us can be really hard. At least it has been for me.

14:24:38 From Mari Spinelli-Albuquerque NM to Everyone:  
@jd Pam Popper is great! Need parallel healthcare for sure

14:24:42 From Philip in NC to Everyone:  
By Land

why:

- be able to grow more of my own food
  - further from city (I'm about 15 miles now)
  - be in a less liberal county
  - less bureaucracy
  - develop a bug-out for my community
- 
- 100 plus acres
  - some infrastructure (gravel roads, lake(s), well(s),septic, barn, house
  - Partially wooded,part meadow, spring or creek
  - 30-45 min. from urban center

- Off of secondary road/long drive (preferably through woods)

14:32:56 From Lisa B. to Everyone:  
But having an agriculture exemption requires you pay those deferred taxes when you stop growing the orchard, raising the animals, sell the property, etc., correct? This is what I was told in the Pacific NW some years ago.

14:33:10 From Damon Clark to Everyone:  
@John and Rebecca, do you know OR can you find out if Dare has Realtor contacts in other states that he can recommend and connect buyers with?

14:33:32 From Ben to Everyone:

14:33:32 From jd to Everyone:  
I second Damon's question.

14:36:48 From DaveS to Everyone:  
Bummer that Californians get so much hate in Texas. Many of us are fleeing tyranny & looking to build community with other freedom respecting folks, naturally Texas is a beacon for that.

You left the Amish for John?! Just kidding.

14:38:53 From Joel B. Peterson to Everyone:

14:39:03 From Megan to Everyone:

@ddesisto - many actually don't leave their politics behind, though. They just want cheaper housing.

14:39:14 From Belinda Wise-Bey to Everyone:

It is a challenge when people can no longer afford to live in the community they grew up in ...gentrification

@catrayl, dude GNM (German New Medicine) is amazing. Completely changed my perspective on "disease". I'm guessing GHK is related..?

14:43:37 From Nathaniel Doromal to Everyone:

I'm learning a lot from this chat. I wasn't familiar with GNM or GHK.

14:44:24 From Mike to Everyone:

@catrayl You're welcome! I'm trying to make that group a HUB for everyone here to connect through TG

14:45:12 From Annie to Everyone:

@Zsana... Great questions about possible future tyranny via money. I don't know the answer, but a lot of engineers in decentralized finance, e.g. crypto, have made enormous progress with solutions that are already being used for a lot of different kinds of transactions.

14:45:36 From Joel B. Peterson to Everyone:

WOW on the Veterans, didn't know!

14:45:51 From Damon Clark to Everyone:

This may sound like a stupid question but is there such thing as Owner Financing for Raw Land?

14:46:24 From Damon Clark to Everyone:

Okay, Thanks John. 😊

14:46:46 From Deb Chandler to Everyone:

Folks need to know, there are also private lenders. Their interest rates may be higher, but they ARE out there. And their requirements are much fewer than conventional lenders.

14:47:02 From Vicky jo Baker to Everyone:

Damon, yes! I own a lot of Land In Louisiana. I would do owner finance.

14:47:29 From Marggy (in the) Wood to Everyone:

Cool!

14:47:39 From Deb Chandler to Everyone:

(They do tend to be for short-term, like if you buy a house that is not habitable, you fix it up, make it habitable, then go get a conventional mortgage...)

14:48:06 From Megan to Everyone:

14:57:12 From Lynn Avery to Everyone:

14:57:33 From Deb Chandler to Everyone:

@Catrayl: Sure thing!

14:57:34 From Megan to Everyone:

I did a lot of research on this Be Your Own Bank thing. It's really not all it's cracked up to be. I'm trying to find the really good resource I read about it that explains what it really is even though it sounds really good.

WHAT HAPPENS TO TOYR COLLATERAL IF THE CRYPTO PRICE CRASHES? DO THEY DEMAND

15:01:45 From Lisa B. to Everyone:  
@ Martha - good question!

15:02:19 From DaveS to Everyone:  
@martha if your collateral loses too much value it will be liquidated to pay  
off the loan

Good news is you won't have to pay back any more of what you owe after that!

15:02:23 From Rebecca Cunningham to Everyone:  
compound.finance

15:02:52 From ddesisto to Everyone:  
Yes, but almost all crypto defi loans (smart ones) are over-collateralized  
to help protect it. Usually it's a bad idea if you loan against 50% or more.

15:03:48 From ddesisto to Everyone:

Shouldn't you have silver coins too, for grid-down situations?

15:08:37 From Josh F to Everyone:  
We're working on mesh networks and energy micro-grids

15:08:39 From Susan to Everyone:

They got flash loan attacked. A bunch of DAOs have been attacked lately

15:09:25 From Alex K from central Ontario Canada to Everyone:  
The vast majority of cell towers have battery backup, some have generators, so the power outage would have to go down for a very, very long time. There are cell site outages that happen all the time. I work in the industry ☺

15:09:31 From ddesisto to Everyone:  
Yes, Terra was an algorithmic stable. Hasn't been usable yet. Others are backed.

15:09:36 From Damon Clark to Everyone:  
An Intentional Community of homesteaders can provide mutual protection and defense against would be maurauders.

15:10:02 From Nathaniel Doromal to Everyone:  
David Martin talks a lot about the importance of commodities to deal with grid down situations.

15:10:10 From Martha Donohue to Everyone:  
DID YOU ALREADY POST LINKS TO INFO ABOUT USINF CRYPTO THAT WAY, FOR PURCHASES, LOANS, etc.?

15:10:30 From Kym A. to Everyone:  
@Lisa B., absolutely. I love Solari. I've also been looking into Armstrong Economics too - Martin Armstrong, I think is his name. Using cash for everything unless I have to use my card.

15:17:15 From Luthie to Everyone:  
sorry Ianto

15:17:19 From Josh F to Everyone:  
I can visualize my cactus zen garden already

15:17:48 From jd to Everyone:  
Ianto Evans has written books on building with cob, Luthie

15:17:48 From Christine to Everyone:  
@ Frank you can build it with passive tech

15:17:57 From Alex K from central Ontario Canada to Everyone:  
That is what we're currently aiming for, although \$75000 won't get us anything in Canada, even if that was \$75000 USD.

15:18:00 From Martha Donohue to Everyone:  
Oh yeah, I heard about someone who ordered. a yurt building kit and then they found out they were not allowed to have a yurt there. I don't know the whole story but what kind of laws would prevent that?

15:18:01 From Luthie to Everyone:  
Thank you

15:18:12 From rose to Everyone:  
Shipping containers are often used to ship pesticides. so be careful

15:18:17 From Alex K from central Ontario Canada to Everyone:  
Or rather nothing in central/southern Ontario.

15:18:31 From Lisa B. to Everyone:  
I lived in a shipping container home that didn't look like a shipping container - it was really nice

15:18:40 From Damon Clark to Everyone:  
QUESTION: Are shipping container homes hurricane and tornado resistant???

15:18:41 From pianomusic to Everyone:  
Air-crete

15:18:48 From Christine to Everyone:

15:19:12 From Leslie to Everyone:  
I like hemp-Crete

15:19:12 From Alex K from central Ontario Canada to Everyone:  
I looked into shipping containers and realized they make no sense as you need to insulate it, and many, many other issues with them that need to be addressed when building.

15:19:31 From jd to Everyone:  
What's the glass house, top left?

15:19:41 From ddesisto to Everyone:  
Whoa, is that a ship on the land?

15:20:10 From jd to Everyone:  
cool, Damon. He is an interesting fellow

15:20:25 From pianomusic to Everyone:  
I helped construct a large yurt and with wood stove heating, temperature regulation can require some attention.

15:20:27 From Martha Donohue to Everyone:  
DO YOU NEED SPECIAL PERMITS FOR THOSE UNDERGROUND TINY HOMES

15:20:34 From Damon Clark to Everyone:  
@John, it's a ship settled on the earth, so that makes it an "earthship" 🌍

15:20:40 From Christine to Everyone:  
Im so into natural building possibilities

15:21:04 From jd to Everyone:  
Frank, something I learned recently about straw bale is that it apparently does not incorporate THERMAL MASS which is key.

15:21:11 From Alex K from central Ontario Canada to Everyone:  
I wish what John just said applied to Ontario, we are way over-regulated, even in the boonies.

15:21:14 From Belinda Wise-Bey to Everyone:  
Oh no a septic tank mafia....our nation is inundated with mafia's

15:21:58 From Lynn Avery to Everyone:

15:22:02 From pianomusic to Everyone:  
BG is intent on satellite cameras actually viewing every square inch on the planet.

15:22:16 From Frank Melli to Everyone:  
Thanks JD. We made that straw bale video over 20 years ago. I like passive tech now.

15:22:44 From Martha Donohue to Everyone:

15:23:14 From Alex K from central Ontario Canada to Everyone:  
@pianomusic we have a realtor who looks them up for us, which is very helpful.

15:23:15 From Lisa B. to Everyone:  
@pianomusic - go to your county office and ask

15:23:21 From pianomusic to Everyone:  
Thanks

15:23:25 From Damon Clark to Everyone:

15:23:26 From Lisa B. to Everyone:  
And it might be online too

15:23:36 From Belinda Wise-Bey to Everyone:

15:24:04 From Azlan White to Everyone:

I'm with Becca I don't want to pump my own poop either

15:24:30 From Damon Clark to Everyone:  
@Rebecca, what do you have against poop? Poop is your friend. You should like poop.

15:24:34 From Rebecca Cunningham to Everyone:  
poo just smells like dirt

15:24:37 From Martha Donohue to Everyone:  
I've heard of incinerating toilets

15:24:39 From jd to Everyone:  
Not sure, that would be a good question for the Earth Haven people...

15:25:00 From Azlan White to Everyone:

15:27:16 From Sannalee to Everyone:

I must live where Coconuts grow easy. Tree of life. Can even run diesel from Oil pressed from cocos

15:40:06 From Lynn Avery to Everyone:

@Ember, losing a home is a process, but yes, if you don't pay property taxes, they will seize the property and put it up for auction. That's pretty standard, actually, but my point is that you can manipulate your income tax burden. Property taxes are decided for you and if you can't pay, bye bye house.

Montana is a great place, true, but if you get land on any Indian reservation (And nothing against the reservation residents), there is much control that one does not have control over, i.e. water rights. Not too long ago, the Flathead res. took away water rights from farmers. So your research if you want to purchase on res. land.

@Aslan, yeah, they want no one left behind/out of their agenda. We need more discussion about resistance, not just exiting.

Concern about the politics in New Mexico part of southwest

15:49:16 From Azlan White to Everyone:

@Megan, yes I am on a smaller 15 acre spot on a hillside above a river, thought it was "temporary," while I looked for a larger ranch property with forest on it. . . . (I have juniper and Pinion, dry desert trees), and the fires moved right through where i may have bought a ranch property, so I'm realizing I'm in a good place relative to them lighting fires.

15:49:16 From Megan to Everyone:

@Deb The SKIP camp is \$1650 I think

15:49:17 From Nathaniel Doromal to Everyone:

what's not so great, Channing?

17:16:49 From Frank Melli to Everyone:

Nematodes are microscopic worms that live in the soil. While there are many kinds that are beneficial, feeding on fungi, bacteria, and other organisms, some harmful nematodes feed on plants. These plant-parasitic nematodes damage root systems and reduce a plant's ability to get water and nutrients from the soil.

17:16:53 From Martha Donohue to Everyone:

Why can rabbit poop & cow poop be used for manure, but not dog poop?

17:17:06 From jd to Everyone:

because it's considered cold compost

So, just FYI, the issue with things like Tower Garden (Juice Plus system) and Mike Adams' container system is that you need the liquid nutrients (chemical based in the Tower Garden.... not sure what Adams' nutrients contain). They're heavy and thus expensive to ship, and they don't tell you how to grow without their fertilizer. IF you could figure out how to grow with, say, compost tea, they would be useful, but I gave my tower garden away because it was so expensive to feed and to buy the little plastic cups required to put every. single. seedling. into. Ufffff.

17:27:58 From Debbie H to Everyone:

Wish my folks would get a mouser. We have some neighboring barn cats but they're NOT helping.

Thanks so much, Rebecca & John! My little one has been a trooper through this, but needs my full attention now :-)

17:45:27 From Linda DiVito to Everyone:  
@Saralina, I completely understand how you are feeling. I feel like I am

chasing my tail. I finally have saved what I thought was enough \$\$ and now prices are so darn high that I don't have enough anymore. I really do not want to take out a loan as I have been down the road of having plenty and the tides turned and everything was lost due to loans that were taken out at the time they seemed like no issue but when income changed dramatically my world was turned upside down.

17:45:29 From Edward to Everyone:

But it's only level 1 and there are some things that you may end up doing in the PEP method. Just requires 3 photos per each assignment to verify
